INCANDESCENT GAS.

Remarkable Discovery Made by a German Inventor.

Consul Deuster, at Crefeld, Germany, reports to the State Dempartment at Wahington a discovery made there which, it is said will revolutionize the methods of illumination. It is an incandescent gas. A single iet of ordinary size can emit a light of much more than 1,000 candle power, and fine print can be read at a distance of 100 feet. The inventor says the cost of a light of 1,500 candle power is only four and one-half cents per hour, while that for an ordinary electric light of 400 candle power is 14 cents per hour.
